VALUE CHAIN

The group is vertically integrated; therefore, we manage our own hatcheries, shrimp farms, and processing plants. This level of traceability in all operations guarantees freshness, safety, and quality, giving us confidence in meeting our customer's requirements.

01. LABORATORY DIVISION

Located on strategic areas to obtain a closer approach and more efficient analysis for our production. As a result, we get an average production of 500 million larvae per month.

02. ACUACULTURE DIVISION

We currently possess 4000 shrimp farm hectares, on which shrimp is produced on a healthy antibiotic free natural environment.

03. LOGISTIC DIVISION

Today, we have 2 ice factories. One located in Daule, and the other one in Yaguachi.

04. EXPORT DIVISION

Group currently owns 2 shrimp processing and exporting facilities. At these establishments, shrimp is processed and packed under strict quality control regulations. AT PROCAMARONEX, 100% of our product is harvested from our own farms.

SUSTAINABILITY

ENVIRONMENTAL

ANTIBIOTIC FREE

Group, we are dedicated to deliver 100% antibiotic-free products. Each item is meticulously sourced and processed in accordance with rigorous National Control Plan standards, guaranteeing no traces of antibiotics.

VALENTINA'S SHRIMP AREA ENERGETIC INNOVATION:

We are in the process of fully transitioning our biggest shrimp farm area to electrical energy, which involves constructing a 42-megawatt substation with a \$1.5 million investment. This initiative underscores our dedication to innovation and sustainability by shifting from diesel to electricity. Our strategic project integrates aeration and electric pumping, with a total investment of \$20 million, pushing the boundaries of environmental innovation.

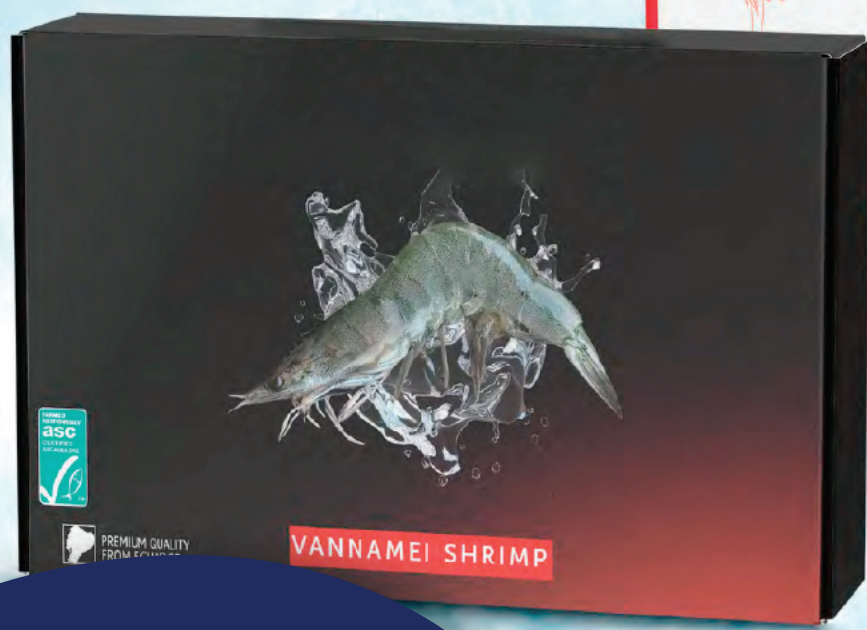

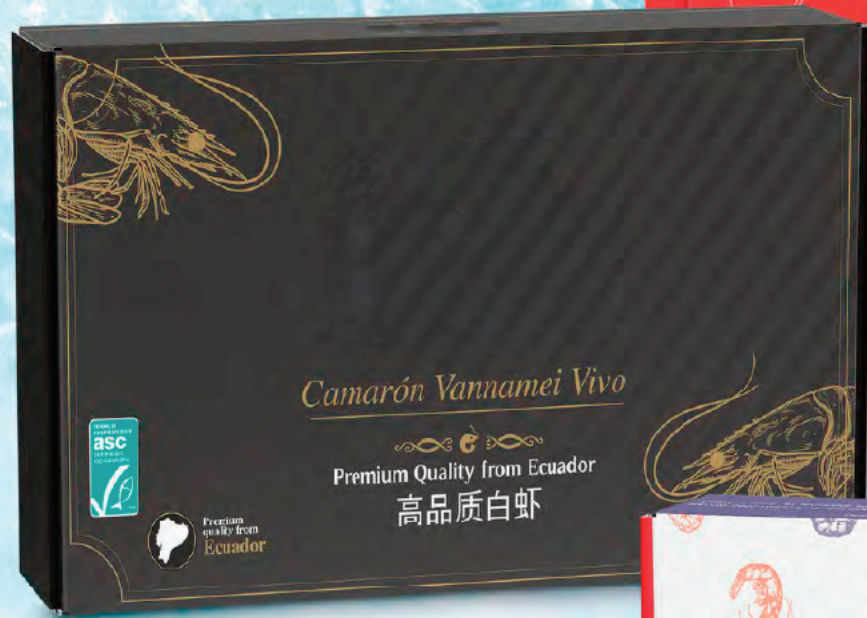

SOCIAL

We believe that true success is measured by the positive impact we make on society. Our social commitment drives us to invest in initiatives that uplift and support the communities we serve. From partnering with local organizations to championing sustainable practices, we strive to create lasting change through our dedicated efforts.

By prioritizing social responsibility; from donating an ambulance truck to Yaguachi Municipality, to providing free WIFI to schools nearby our farms; we had also initiated a social assistance foundation named "Fundación Otilia Duarte" for the most disadvantaged in the community.
